DATE: 13 - NOVEMBER -2002  
TO: ANTONINO SILIPIGNI - T.A.G. srl  
FROM: EDWARD W. FLYNN  
RE: PROVISIONAL SOURCE - HEAT TREAT  
CC: FILE, JOHN FINN

Mr. Silipigni:

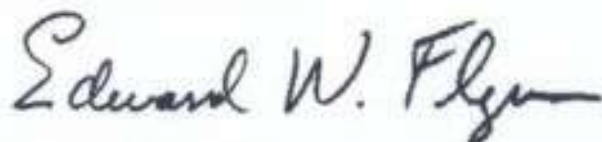

Thank you for participating in the heat treat test as prescribed by our specification DC-9999-1 (H-13 Material and Heat Treat Spec).

Passing this test proves that you are capable of meeting the world class requirements of the General Motors specification.

This serves as official notification that T.A.G. srl, Dolzago, Italy has passed the heat treat test (16" cube) and is a provisional supplier to GM. T.A.G. is now permitted to heat treat GM die cast die inserts for our tool sources. This is a major accomplishment. Many heat treaters have participated in the test but few have had the resources, organizational skill and equipment to actually exceed the requirements of the specification.

We look forward to working with you during the 45 piece / 40 month period moving toward full approval status.

CONGRATULATIONS,

EDWARD W. FLYNN
